

adult epilepsy clinics and assessment centres

This list is in alphabetical order by town or city (in bold). In some areas there are neurologists and specialist nurses with an expertise in epilepsy, based in general hospitals. This list may not have all current UK clinics and centres with an epilepsy specialism, and you may find another clinic closer to you.

You can talk to your GP about being referred to a specialist. If you are being referred for non-urgent specialist treatment, you may be able to choose which hospital you would like to go to. To find out more about this 'choose and book' system visit www.chooseandbook.nhs.uk
